Abstract

The level of investment activity in the region is defined by the effectiveness of its economy. Consequently, win those who create the most favorable conditions for the development of business, especially in conditions of growing uncertainty. In this article the most important factors influencing the inflow of investments into the economy of the Republic of Tatarstan on the basis of the method of mathematical modeling are identified. The offered regressive model allows the governmental bodies of the Republic of Tatarstan to provide the necessary impact on the factors the stimulation of which will increase the inflow of investments in the fixed capital of the regional economy. © IDOSI Publications, 2013.
